BASEMENTS

**Total
Release
Fogger**

Vaporize is specifically designed to eliminate the toughest smells, including tobacco, garbage and odors from pets. It comes as a single release aerosol or fogger.

How to use:

Simply place the fogger on the floor of the room containing tobacco (or other) odor, press a button and exit for ten minutes. Upon return, the smell is neutralised and the room is left smelling mountain fresh.

Why is Vaporize better than an ordinary air freshener?

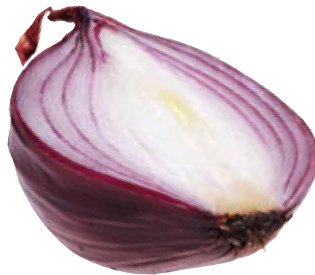

Vaporize works differently from most air fresheners that dispense a perfume into the air to mask unpleasant smells. Its active ingredients are essential oils such as eucalyptus, which encapsulate the smoke particles and so effectively render them odorless. Vaporize is capable of de-odorising a room up to 30ft x 30ft.

Order directly from the Environmental Biotech web site (details below).

*Severe cases may require multiple treatments. Can be used to keep rooms fresh as a regular routine. Please follow instructions for best results.

- Non Toxic
- No Residue
- Permanent Odor Capture

**Now available
as a dispensing
spray system**
